## **Export Transport Order**

Thursday, February 26, 2015 11:27 AM

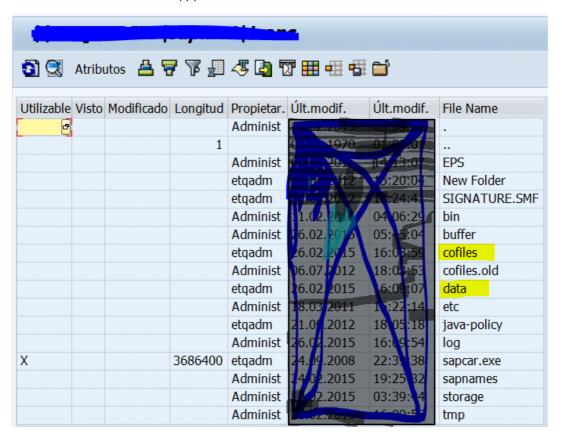

STEP 1: Go to se09 and released your order. With all kind of objects you wish to export.

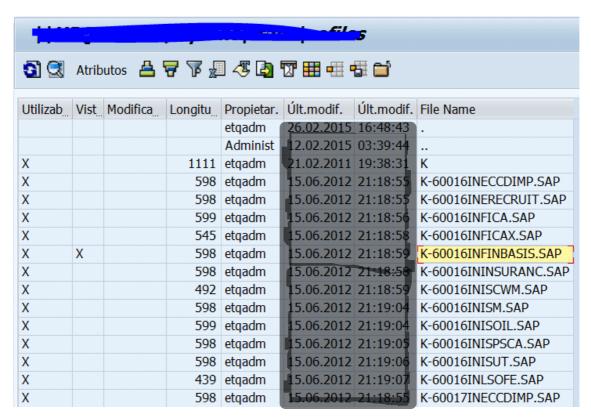

STEP 2: Go Al11 Code transaction. And search for "DIR\_TRANS" section.

STEP 3: Get into COFILES and copy your order's Path.

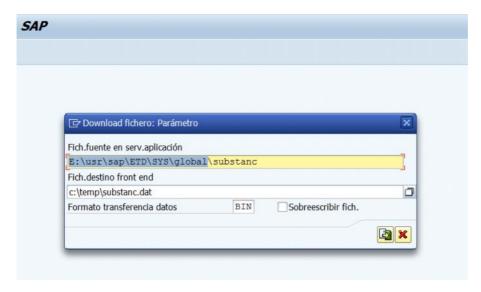

Order's Path

STEP 4: do the same in the data section. Just remember that Cofiles is for order's header and Data is for order's details.

Note: Now that you the order's data, you're able to export to external system or import from it.

STEP 5: Go to CG3Y To export your order.

Substanc must be your order's name or number. E:\usr... is the path that you already copy. c:\temp ... is your path machine.

At the end you'll get this two files, K is the order's header and R is the details.

If you want to import those order on your system, go to  $\mathbf{CG3Z}$ 

And do the same.
